JESUS VISTA

SENIOR FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Results-driven Senior Frontend Developer with 10+ years of experience crafting high-performance web applications. Skilled in React, Angular, TypeScript, and modern CSS frameworks, with a strong emphasis on building scalable, reusable components and responsive designs. Experienced in leading teams, mentoring developers, and delivering innovative UI/UX solutions. Committed to continuous learning, staying ahead of industry trends, and leveraging technology to drive impactful solutions.

TECHNICAL SKILLS

Frontend Development

React, Nextjs, React hooks, AngularJS, Angular (15+), Context API/Redux/NgRx State management, TypeScript, Rxjs, JavaScript (ES6+), HTML5, CSS, Sass, Flexbox/Grid CSS, Bootstrap, TailwindCSS, Material UI, JQuery, SPA, Mono-repo Architecture, Micro-Frontend Module Federation

Backend Development

RESTful API Development, JavaScript, Nextjs, Node.js, Express.js, .NET, MySQL, MongoDB, Redis, Postman

Worked with AWS EC2 and S3 for minor deployments, along with Firebase and Vercel for hosting and backend services

Tools & Platforms

Package managers, Angular CLI, NX, State management, Webpack / builder and task runners, Docker, Jenkins, Git, JIRA, Agile, Postman, Netlify, Vercel

Familiarity in AWS EC2, S3, Lambda, CI/CD Github actions, Putty SSH

Testing

Unit & E2E Testing (Protractor, Jasmine, Karma, Mocha / Chai), Accessibility (508 WCAG Compliance), Cross-browser compatibility

Other

Web sockets (PubSub), Responsive Design, API Integration, OOP Concept, UI/UX Collaboration, Google Map, Leaflet Map API, Chart.js, D3.js

PROFESSIONAL EXPERIENCE

Scaleflex – *Frontend Engineer*

April 2025 – Present * Lyon, France

- Built and maintained frontend products across Scaleflex's DAM (Filerobot) and image-CDN (Cloudimage) suites – admin SPAs, embeddable libraries, and a shared design system.
- Shipped new features spanning billing/Stripe flows, permission-gated routes (role-based via createRole), tabbed page layouts, and integrations against the Cloudimage REST API and the geo-replicated Filerobot endpoints.
- Balanced redesign work against an established legacy framework (CRA, react-app-rewired, Material-UI v4, shared-admin-kit plugin chain, Sentry source-map releases) without breaking customer workflows.
- Work in an AI-augmented workflow with Claude Code: author and maintain per-repo CLAUDE.md context files, use project-scoped subagents (DocsExplorer, Explore, Plan) for codebase navigation and design review, and consume team-built skills (e.g., integrate-asset-picker) and MCP integrations as part of daily development.
- Own the end-to-end release cycle for public Scaleflex packages (Scaleflex Widget, @scaleflex/react-url-builder, js-cloudimage-responsive, and others): build pipelines (Babel / Rollup / Vite) CHANGELOG curation, tag-triggered GitLab CI publishes, dual npm + Scaleflex CDN releases with latest / beta / rc dist-tags for staged rollouts, plus dependency upkeep and npm-audit triage.
- Established the per-component file convention and migration path from the legacy @scaleflex/ui (styled-components) to the new Tailwind-based library, used across multiple Scaleflex admin products.

Odyssey Computing Inc (multiple clients) – *Senior Frontend Developer*

NOV 2018 – OCT 2024 * California, USA

- Led the design and implemented scalable frontend architectures for multiple Angular and React projects, optimizing performance and maintainability.
- Developed and optimized high-performance web applications by transforming UI/UX mockups into interactive, reusable components using TypeScript, modern CSS frameworks, and state management libraries (NgRx, Redux, React Query).
- Spearheaded the creation of innovative dashboards and widgets, optimizing user interaction.
- Improved code efficiency by refactoring, standardizing best practices, and implementing modular design patterns, increasing developer productivity and maintainability.
- Collaborated with backend teams and API developers to integrate RESTful APIs, ensuring seamless data flow and real-time updates.
- Collaborated closely with the mobile developer to ensure that the web and mobile functionalities were aligned for optimal performance.
- Mentored junior developers, fostering skill development and promoting best practices.
- Developed reusable component libraries and automated build scripts, leveraging AI-assisted development tools to streamline the CI/CD pipeline and optimize performance.

RCG Global Services (Disney Client) – Software Developer

MAR 2021 – JUNE 2022 * Makati City, Philippines

- Collaborated with Disney teams to develop dynamic dashboards and responsive interfaces.
- Improved system performance through API and middleware enhancements.
- Ensured high standards of accessibility and cross-browser compatibility for critical applications.
- Participated in Agile ceremonies, contributing to sprint planning and retrospectives.
- Optimized dynamic UI rendering, reducing load times by 25%.
- Enhanced the accessibility features to meet 508 WCAG standards, improving usability.
- Developed and implement third party video streaming platform

Outsourced PH (Delta Logic Swiss Client) – Frontend Developer

JUNE 2018 – MAR 2021 * Eastwood, Quezon City, Philippines

- Migrated legacy AngularJS codebase to Angular 7+, ensuring compatibility and improved performance.
- Developed a legal case management system for government use in Switzerland.
- Maintain and implement dynamic component rendering based on JSON structure from backend
- Integrated APIs with a Java backend, focusing on frontend functionality and dynamic updates.
- Increased codebase maintainability through modular design.
- Enhanced UI/UX features, leading in user engagement.

Dibz (Startup) – Lead Frontend Developer

MAR 2016 – NOV 2018 * Ortigas, Pasig City, Philippines

- Implemented a drag-and-drop page builder for customized dashboards.
- Developed real-time parking reservation and management apps, integrating WebSocket for real-time updates.
- Enhanced user experience with map libraries and dynamic visualizations.
- Revolutionized parking management for metropolitan areas, increasing efficiency through dashboard and map implementation.
- Successfully led the frontend development of critical features, driving product adoption.

Concentrix – Full Stack Developer

JULY 2016 – JUNE 2018 * Mandaluyong City, Philippines

- Designed and implemented a drag-and-drop module for constructing dynamic web pages
- Developed widgets with advanced styling options, ensuring a flexible and intuitive user experience
- Integrated real-time data fetching from databases to enable automatic updates and rendering of charts upon page sharing and integration.
- Optimized graph visualization by introducing Pusher/WebSockets, delivering seamless real-time updates and enhancing user interactivity.
- Collaborated with cross-functional teams to ensure modularity, scalability, and maintainability of the feature.

One Network Ecommerce – *Angular Developer*

MAR 2015 – JUNE 2016 * Ortigas, Pasig City, Philippines

- Developed multiple E-commerce websites using AngularJS, integrating API calls, and specializing in template slicing and converting PSD designs into pixel-perfect HTML.
- Collaborated closely with designers to create customized UI/UX solutions for various client websites.
- Contributed to the frontend team's efforts by building a UI kit with ReactJS for company-related websites.

EDUCATION

BULACAN STATE UNIVERSITY – *Master In Information Technology (In Progress)*

2025 – Present, Malolos, Bulacan, Philippines

STI COLLEGE FAIRVIEW – *Bachelor's Degree In Information Technology*

2011 – 2015, Quezon City, Philippines
